Summary

A Full Stack Developer with hands-on experience in building and deploying web applications. Skilled in MERN stack and Django, along with real-time systems, REST APIs, and other third-party integrations. Passionate about building user-focused solutions and contributing to impactful engineering teams.

Education

Polaris School Of Technology <i>Integrated B.Tech in Computer Science (AI and ML)</i>	2025– Present <i>SGPA: 8</i>
Sainik School Purulia <i>Class XII (Intermediate)</i>	2023– 2024 <i>Percentage: 70%</i>
Sainik School Purulia <i>Class X (Matriculation)</i>	2021– 2022 <i>Percentage: 89%</i>

Experience

Freelance Developer <i>Professional Doctor's Portfolio Website Live Github</i>	January 2026 <i>Remote</i>
- Designed and developed a responsive portfolio website for a neurosurgeon with 10+ years of experience and 5000+ patients treated, improving professional visibility and patient accessibility. - Structured key content sections including specialization, certifications, clinical experience, and testimonials to enhance credibility and user trust. - Implemented an appointment and contact system with patient inquiry forms and communication channels (phone/email), along with Google Maps integration and responsive UI for seamless cross-device interaction.	

Projects

8Byte - Social & Professional Networking Platform <i>Django Rest Frameworks</i> Live Github	December 2025
- Developed a full-stack platform using Django enabling users to create profiles, connect, and share media content . - Implemented a secure authentication system using JWT tokens and OTP-based email verification to ensure real user. - Built real-time communication features including 1:1 chat, community messaging, and video/voice calling using Agora RTC SDK, along with presence indicators and emoji-based interactions to enhance user engagement.	
8Track - Academic Management Application <i>MERN Stack</i> Live Github	April 2026
- Developed a full-stack web application to help students track attendance, assignments through a centralized, dashboard. - Built a productivity system with priority filtering, deadlines, and a Pomodoro-based focus mode to improve efficiency. - Engineered a subject scheduling module with timetable automation and two-way Google Calendar integration to sync schedules and deliver real-time notifications across devices which improved students attendance and productivity by 10%.	

Technical Skills

Languages : Python, HTML/CSS, JavaScript, SQL, C++,
Frontend Development : React.js, HTML, CSS, Zustand, Axios
Backend Development : Node.js, Express.js, Django, Django REST Framework
Databases & Storage : MongoDB, PostgreSQL, Supabase , MySQL
Authentication & Encryption : JWT, Google OAuth, bcryptjs, Fernet
APIs & Integrations : REST APIs, Google Calendar API, Gmail SMTP, Nodemailer
Tools & Platform : Git, GitHub, Vercel, Render, Azure, Cloudflare, Figma, Canva
Others : Agora RTC SDK, Web Push API

Certifications & Achievements

TechLavya Hackathon – 3rd Position <i>RKM Government Engineering College</i>	May 2023 <i>View Certificate</i>
District Science Fair – Rolling Trophy <i>Birla Industrial & Technological Museum</i>	December 2023 <i>View Certificate</i>
Student Academic Affair Secretary <i>Polaris School Of Technology</i>	March 2026 <i>View Certificate</i>
NCC 'A' Certificate <i>National Cadet Corps</i>	January 2024 <i>View Certificate</i>
